Summary

Backend Developer specializing in Laravel and RESTful APIs.
Experienced in building scalable backend systems with authentication, role-based access, and database design.
Built real-world projects including Clinic Management and E-commerce systems.
Seeking an internship or junior backend role.

Technical Skills

Backend: PHP, Laravel
Databases: MySQL
Programming: C++, Python
Tools: Git, GitHub, Postman, VS Code, Laragon
Concepts: OOP, MVC Architecture, RESTful APIs
Languages: Arabic (Native), English (Intermediate)

PROJECTS

Clinic Management System API

Laravel, PHP, MySQL, Laravel Sanctum

- **Developed a RESTful API with role-based access control (Admin, Doctor, Receptionist)**
- **Implemented secure authentication using Laravel Sanctum**
- **Built full CRUD modules for core entities (Patients, Appointments, Medical Records, Billing)**
- **Designed scalable data architecture using Eloquent relationships, Form Request validation, and API Resources**
- **Developed automated billing system using observers**
- **Implemented search, filtering, and soft delete with restore functionality**
- **Optimized performance using pagination and eager loading**
- **GitHub: (حط اللينك)**

E-commerce Website (Full-Stack)

Laravel, PHP, MySQL, Blade

- **Built a full-stack web application using Laravel and Blade**
- **Developed backend logic for authentication, products, and order management**
- **Implemented database relationships and secure data handling**
- **GitHub: https://github.com/username/project-name**

POS & Restaurant Management System (In Progress)

Laravel, MySQL, Blade

- **Developing a full-stack system using Laravel and Blade**
- **Building admin dashboard for managing products, orders, and users**
- **Implementing role-based access control**
- **GitHub: https://github.com/username/project-name**

Experience

Backend Developer (Personal & Academic Projects)
Oct 2024 – Present

- **Developed multiple backend systems using Laravel and PHP**
- **Built RESTful APIs with authentication, authorization, and database integration**
- **Collaborated in student developer communities to build team-based projects**
- **Practiced clean code principles and MVC architecture**

Education

B.Sc. Computer Science, Zagazig University – Egypt (2024 – Present) | C++, OOP, Data Structures, Algorithms, Databases
